shoe pairs produced per day

Intro

OUR COMPANY

ALBA ® GROUP was established in Albania, in Lac, in 1993 for the production of uppers. Over time, the company has grown significantly becoming a reference point for several national and international brands.

The great foresight and initiative of its owners, the special know-how, as well as the constant investment in the latest technologies, has fostered the opening of new production facilities in Tirana, Valona and Kruja. The companies Group becomes one of the best and most important economic realities of Albania, not only for the uppers' production, but also for the complete production cycle of footwear, in particular for safety and occupational shoes. In 2006 a new company called Alba&N was founded in Italy (Trani) and became the bridgehead for the European and world market.

This company concentrates the commercial and logistics management,

as well as the Research and Development department.

Over the years Alba&N has gained the trust of important companies all over the world and its brand, with a wide and varied range of safety and occupational shoes, is increasingly recognized and appreciated as synonymous of innovation, quality and comfort.

(ALBA SHOES® E.U. patented brand n° 013226287)

ALBA SHOES® GROUP SH.P.K.

Quality Management System complies with ISO 9001:2008

Organization

SAFETY SHOE FACTORY

Our organization boasts several advantages making our products reliable and highly competitive in terms of quality and costs.

1. LAC

SAFETY SHOE FACTORY

30.000 m²
600 people employed

2. TIRANA

STITCHING UNIT

5.000 m²
300 people employed

3. VALONA

SAFETY SHOE FACTORY

16.000 m²
800 people employed

4. KRUIJA

STITCHING UNIT

3.000 m²
200 people employed

5. TRANI

SALES & LOGISTICS CENTER

6.000 m²
25 people employed

FLEXIBILITY

We are able to meet all productive requests, even of customized items, thanks to a strategic collaboration between our Italian designers and our 4 productive departments located in Albania. Our factories employ about 2000 people and 6 PU injection machines (single-density and double-density PU/TPU and PU/Rubber) and 1 PU insoles machine. Our total productive capacity is 8000 shoe pairs per day.

RAPIDITY

We deliver our products in a very short time because almost all shoe components are manufactured internally. Successively we entrust the logistic management to an efficient office in Italy responsible for international deliveries.

QUALITY

Our company is certified according to the "Quality Management System ISO 9001:2008" by TÜV Austria. We firmly believe in constant quality and technological research, to make our products unique in terms of reliability, comfort and beauty.

RE-CHOOSE®

Recycle Reduce REuse RE-CHOOSE

Aware of the growing and pressing environmental problems, Alba&n has launched a footwear line with uppers, linings and accessories from the recycling of post-consumer PET bottles.

Always projected towards the future and innovation, Alba&n has collected the market trends towards a more careful and sustainable consumption and has decided to give life to the new RE-CHOOSE line, synonymous with a philosophy of responsible change. Making the right decision is never easy, but sometimes it's sorely needed.

"RE-CHOOSE" comes to life from the union of two words:
REcycle and Choose

Choose the change, start with your safety footwear!

The RE-CHOOSE collection consists of ultra-light and comfortable safety footwear, made from parts of 100% PET materials and processed by GRS certified Italian companies.

EXTRA QUALITY TECHNOLOGY

LIGHT, FLEXIBLE, SAFE

SYMBOLS

Metal-free shoe

200-J toe protection

Antiperforation midsole

Slip resistant sole

Oil and hydrocarbons resistant sole

Shock absorber in the heel area

Metatarsal protection

Insole with memory foam

Synthetic fur lining

Electrostatic dissipative shoe

Recycled upper material

Shoe compliant with DGUV112-191

Guide

HOW TO CHOOSE

Category	Additional requirements	Class
SB	basic requirements	I o II
S1	closed heel area + A + E (S1P, S1PL, S1PS also have a penetration insert)	I
S2	S1 + WPA	I
S3	S2 + cleated outsole + P (metal)	I
S3L	S2 + cleated outsole + PL (non-metal)	I
S3S	S2 + cleated outsole + PS (non-metal)	I
S4	closed heel area + A + E	II
S5	S4 + cleated outsole + P (metal)	II
S5L	S4 + cleated outsole + PL (non-metal)	II
S5S	S4 + cleated outsole + PS (non-metal)	II
S6	S2 + WR	I
S7	S3 (P metal) + WR	I
S7L	S3L (PL non-metal) + WR	I
S7S	S3S (PS non-metal) + WR	I
OB	basic requirements	I o II
O1	closed heel area + A + E	I
O2	O1 + WPA	I
O3	O2 + cleated outsole + P (metal)	I
O3L	O2 + cleated outsole + PL (non-metal)	I
O3S	O2 + cleated outsole + PS (non-metal)	I
O4	closed heel area + A + E	II
O5	O4 + cleated outsole + P (metal)	II
O5L	O4 + cleated outsole + PL (non-metal)	II
O5S	O4 + cleated outsole + PS (non-metal)	II
O6	O2 + WR	I
O7	O3 (P metal) + WR	I
O7L	O3L (PL non-metal) + WR	I
O7S	O3S (PS non-metal) + WR	I

Symbol	Requirements/Specifications	
P	perforation resistance	
PL		metal insert (nail Ø4,5mm)
PS		non-metal insert (nail Ø4,5mm)
	non-metal insert (nail Ø3,0mm)	
C	electrical resistance: partially conductive footwear	
A	electrical resistance: antistatic footwear	
E	energy absorption of seat region	
HI	heat insulation of sole complex	
CI	cold insulation of sole complex	
HRO	resistance to hot contact	
FO	resistance to fuel oil	
WR	water resistance	
WPA	water penetration and water absorption	
SR	slip resistance	forward heel slip
		backward forepart slip
Ø	slip resistance test not carried out due to the special purposes outsole (spikes, etc.) and for use for very special work places (soft ground e.g. sand, sludge, forestry timber, etc.)	
CR	cut resistance	
M	metatarsal protection (only for EN ISO 20345)	
AN	ankle protection	
SC	scuff Cap	
LG	ladder Grip	

PERFORMER

**A happy man has hands full with work
and a soul full of freedom.**

**Performer, the style rewarding you
in every moment of the day.**

INSOLES

Insole in highly elastic polyurethane coated with grey or black lining or with synthetic suede.

CHARACTERISTICS

Antibacterial, antistatic, ergonomic with PU cushion which reduces vibrations and shocks, hand-washable at 30°C

ELISA GREY

ELISA MEMORY FOAM

ELISA SUEDE

CLAUDIA BLACK/GREY

SOCKS

HIGH HOT

COMPOSITION

57% COOLMAX® - 20% Cotton
17% Nylon - 3% Elastane
3% Antistatic Thread

Thermal regulating sock made with COOLMAX® thread pattern keeping the foot dry. Padded collar, Achille's tendon and malleolus. Warm windproof cotton. Reinforced toe and heel areas. Antistatic thread.

HIGH FRESH

COMPOSITION

76% COOLMAX® - 18% Nylon
3% Elastane - 3% Cotton

Summer sock with COOLMAX® pattern keeping the foot dry. Padded bottom, reinforced heel and toe areas. High grip through the double elastic bands. Antistatic fiber insert.

UNDER FRESH

COMPOSITION

80% Cotton - 17% Nylon
3% Elastane

Comfortable and breathable soft cotton sock with sponge pattern to soak the sweat up. Reinforced heel and toe areas.

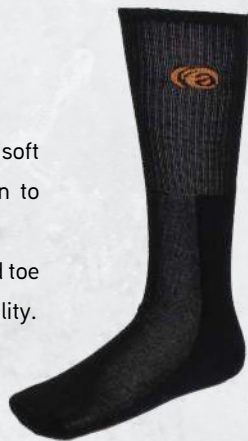

HIGH BASKET

COMPOSITION

80% Cotton - 17% Nylon
3% Antistatic thread

Antistatic and breathable sock in soft cotton made with sponge pattern to soak the sweat up.

Flat stitching and seam, reinforced toe and heel areas for a longer durability.

HIGH COMPRESSION

COMPOSITION

80% Cotton - 17% Nylon
3% Elastane

Sock with graded compression for helping the blood flow stimulation, reducing the swelling and increasing the blood circulation. Padded insert on the foot and supports for boots.
